Hydraulic or pneumatic mandrels

In addition to the full range of pipe bending machines, EPE offers pipe bending hydraulic mandrels to optimize bending operation in case of light wall thicknesses, avoiding buckling of the pipe.

We offer manual (up to 14") or hydraulic mandrels with up to two motors in a wide range of sizes which can be easily fed through the dedicated PTO outlet of the bending machine.

Pipe rollers

Pipe drive rollers complete of ball bearings rollers easy the handling of the pipe

ENGINE

Caterpillar or Yanmar diesel engines are selected as the best fitting solution according to the size of the equipment all of them including integrated filtration system, and self-stretching fan towing seals.

Bending sets

EPE bending sets are manufactured with high quality steel, welded and reinforced in high stress areas for maximum strength and resistance. The internal surface is finished with tooling machines to guarantee the required accuracy and can also be proposed with Polyurethane lining upon request

Wheels

Small bending machines are mounted on wheels for easy touring and limited maintenance.

PLATFORM AND DASHBOARD

The position of the control platform makes EPE bending machine unique in terms of operating comfort and guarantees maximum visibility and low noise levels to the operator.
